

# Beam Jack

**HJN-750 HJN-1100 HJN-1110 HJN-1410**

Lifting reinforcement beams to ensure bar arrangement and easy tying.

With one-touch function of quick up & down release easy to set up the chain.

- Accurate tying and lifting whilst in a comfortable posture.
- Easy control of arrangement for dismantling, changing height, and setting up on uneven ground.
- Light weight for easy carrying.
- Suitable for beam arrangement.
- Efficient and high quality finish.
- Galvanised for corrosion control.
- Beam Jack for 1t uses stronger material.
- All models can accommodate pipes up to 35mm diameter.

■SPEC Beam Jack

Item No.	Height	Width	Usable dimension	Lifting capacity	Weight
HJN-750	1500mm	750mm	620mm	500kg	18kg
HJN-1100	1500mm	1100mm	950mm	500kg	22kg
HJN-1110	1500mm	1100mm	950mm	1000kg	30kg
HJN-1410	1500mm	1420mm	1270mm	1000kg	32kg

※ HJN-1410 is made to order.

# Beam Jack Stand

HS-110J HS-111J HJN-1100S

## Separable Type

[enlarged view]  
Place the side of jack on top of the pole tray.

**HS-110J** \*Horizontal pipe is sold separately.

## Separable Type

**HJN-1100S** \*Horizontal pipe is sold separately.

HJN-1100S—added a stand function to Beam Jack .  
(added a hook and horizontal pipe to vertical bar.)

- A type of separable Beam Jack  
(Set up the Jack on top of Beam stand after carrying beams over.)
- Free control of width depends on the size of reinforcement beams.
  - Easy to carry because of the separated Jack and stand.

Example of using Beam Jack
