

Air Conditioning Jacket

- The air conditioning jacket has two fans, on both the left and right around the waist.
- These draw in the air, dries off sweat, and cools the body down by evaporation heat.

Air Conditioning Jacket for Rebar Worker

Heatstroke prevention

Increased worker comfort & efficiency

COOL!!!

Rigid shoulder protector Hood type ①

The hood carries the air into the helmet for heat prevention around the head.

Rigid shoulder protector Standing collar type ②

Standing wide collar under the chin carries the air to the face and the cheeks.

POINT ① Dual layer cushioned shoulders.

POINT ② Air enters through jacket slits.

POINT ③ Air circulates around the neck.

POINT ④ Titanium processing prevents heating.
